

Application Acceleration Using Oracle 10

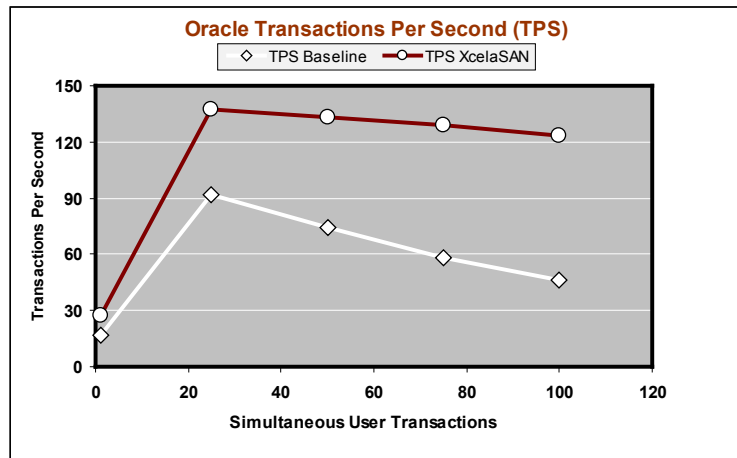

XcelaSAN® Benefits:

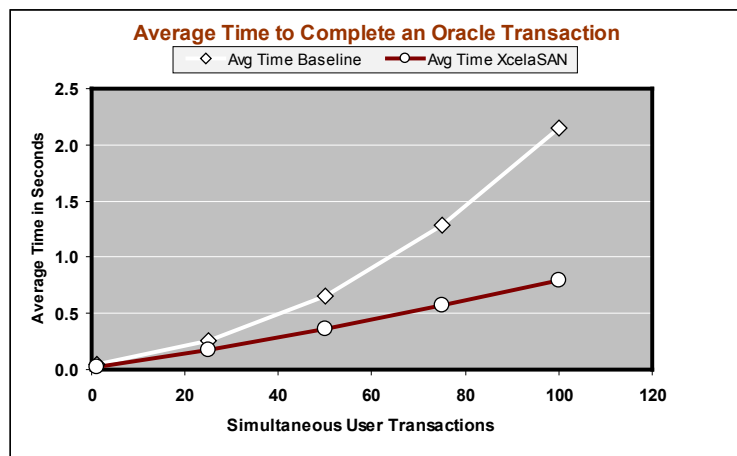

- Improve reliability of systems with high availability
- Complete more transactions per second in daily operations that use Oracle 10 database
- Reduce the average time to complete a transaction – this is significant in financial and stock trading industries, healthcare or any data-intensive process that uses Online Analytical Processing (OLAP) or Online Transaction Processing (OLTP)
- Reduce OLAP and OLTP latency, query time and end-of-day batch processing time
- Increase peak transaction capacity to support more users, improve data warehousing and Business Intelligence (BI)

High Performance, High Availability, High Value

XcelaSAN® delivers a significant increase in Oracle Transactions per Second from 46 to 123 – a 268% increase!

XcelaSAN® delivers a significant reduction in the Average Time in Seconds to complete an Oracle transaction, from 2.146 to 0.798 – a 63% decrease!

Test results produced using Benchmark Factory®
