

## Application Acceleration Using MS SQL

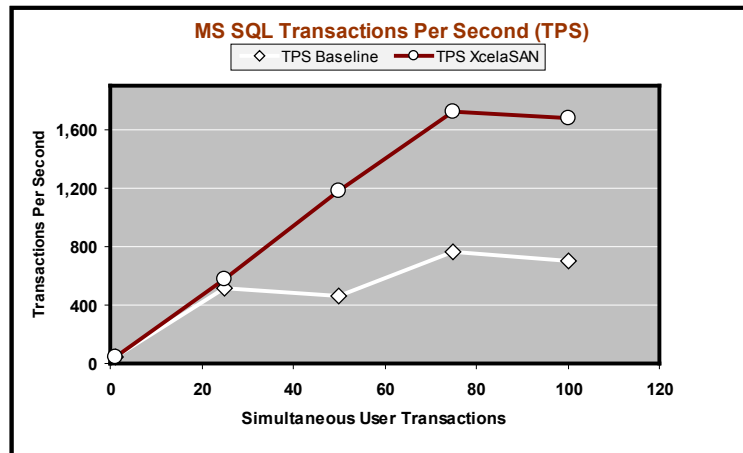

### XcelaSAN® Benefits:

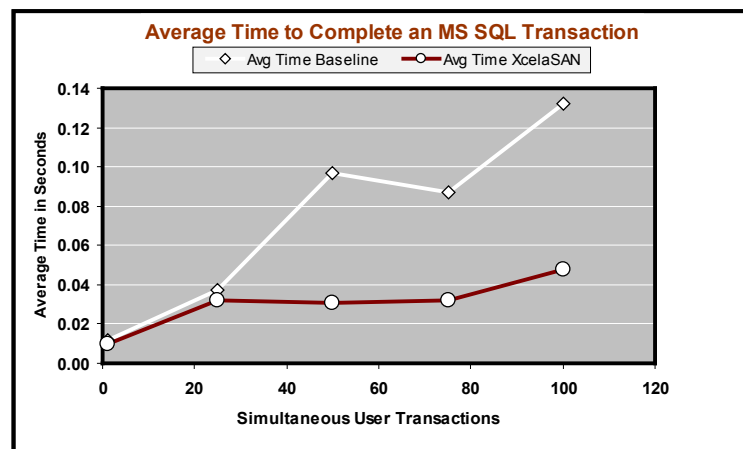

- Improve reliability of systems with high availability
- Complete more transactions per second in daily operations that use MS SQL database
- Reduce the average time to complete a transaction – this is significant in industries such as manufacturing, online auction websites and financial/banking services
- Reduce SQL database latency, reduce degradation in response time and eliminate storage bottlenecks
- Improve response times and support more concurrent users to increase customer satisfaction and provide superior customer service

### High Performance, High Availability, High Value

XcelaSAN® delivers a significant increase in Transactions per Second from 699 to 1,677 – a 240% increase!

XcelaSAN® shows a significant drop in Average Time in Seconds to complete a transaction from 0.132 down to 0.048 – a 64% decrease!
